MARKETING INFORMATION	Marketing Description				
	Evian is the favourite water of a great number of people, which they enjoy having delivered to their office, home or establishment in UK and Europe by Aqua Amore, directly from our London warehouse. Behind the proliferation of marketing hype it a very drinkable water though not necessarily one that is thirst quenching. It is soft and has quite a creamy texture; this is as a result of the relatively high presence of Bicarbonates within the mineral balance. Every drop of Evian begins as rain and snow falling high in the pristine French Alps. This water then spends at least 15 years slowly filtering through a vast, protective aquifer deep within the mountain. The aquifer consists of glacial sand and that is what gives Evian its unique taste and mineral composition.
